

Agency of supported services, Žilina, Slovakia

We provide social services for people with disability to support their ordinary life in the community.

Things that are important for us:

- meaningful activities (living, work, leisure time)
- individual approach
- respect for individuality, uniqueness
- cooperation with families and community
- cooperation with volunteers
- high expectations and vision for future

What we think we can offer:

International festival of fantasy and creativity Jolieworkshop 2011 (5.-7.9.2011)

We would like you to come sooner to feel the atmosphere of preparation (1.-8.2011 ?)

What we would like to learn?

Discussion with members of community (parents, people w disability, volunteers, town representatives, professional staff?) about:

1. PCP, system of services in the community, experiences of people living in the community
2. Supported decision making, advocacy of human rights, initiative due to Convention, PCP tools
3. POPI and PCP how do they work together

What we want to develop :

- weak structure of support, lack of system
- lack of professional staff
- financial support not continual
- weak PR – Do people in community know about our services?
